

THE GOBLIN'S GUIDE TO DUNOON DAEMON APP

v2.1.0 - One-page quickstart for complete beginners

WHAT IS LOCAL AI? The model runs on your own PC. The Dunoon Daemon app loads a local GGUF model and keeps your personas, chats and learned memory on your machine. Benefits: privacy, offline use after download, no per-message cloud meter, model choice, persistent local personas, and freedom to experiment.

1. GET A GGUF MODEL

- * Go to Hugging Face: huggingface.co/models?search=GGUF — then choose a GGUF instruct/chat model.
- * Download one .gguf file. Start with Q4 or Q4_K_M when available.
- * If the model uses vision, keep its matching mmpoj .gguf beside it.

VRAM → FIRST MODEL TARGET

VRAM	START HERE
4 GB	2B-3B Q4
6 GB	4B-7B Q4
8 GB	7B-8B Q4
12 GB	12B-14B Q4
16 GB	14B-20B Q4
24 GB	27B-32B Q4
32 GB	32B Q5 / ~40B Q4
48 GB+	70B Q4

Goblin rule: leave headroom. Aim for the model file at roughly 70-80% of VRAM, not the whole lot.

2. FIVE-MINUTE QUICKSTART

1. **CREATE** Make a new session.
2. **PERSONA** Write one, or Roll persona.
3. **RANDOMISE** Optional: roll a fresh OCEAN personality.
4. **LOAD GGUF** Pick the .gguf you downloaded.
5. **OPEN CONVERSATION** Choose Continuation.
6. **SAY HELLO** That is genuinely enough.

BEFORE FIRST RUN

Download DunoonDaemon_v2.1.0.zip and choose Extract All.

Do not run Dunoon Daemon from inside the ZIP file.

Keep DunoonDaemon.exe and the bundled bin folder together.

Run DunoonDaemon.exe. No separate Python installation is required.

Then: one persona. One model. One Hello.

3. WHEN YOU WANT MORE

MEMORY	LORE	ARENA
Continuation lets a persona learn useful facts, plans and tasks across chats.	Upload a book, then tick only the personas allowed to know it. World knowledge is not automatically character knowledge.	Create a bard and a silver dragon, put them above the clouds, establish the scene, press Auto, and discover why the full Tome exists.

Set down by Sorvan the Bard, with corrections from an Ancient Silver Great Wyrn.

Created by sorvan67 (Keplers65) and ChatGPT - Human / AI Fusion (2026)
